

Build & Race

ADVANTAGES

- French / English
- Personalized and festive construction
- Dynamism & cohesion
- Common goal

10 – 200 PEOPLE.

2H Minimum

3H Maximum

It is crisis, soon there will be no petrol, the gas price keeps increasing, pollution gets worsened... Let's then build up tomorrow's vehicles together: a formula 1, a Roman chariot... made of reusable cardboard of course!

You are brilliant engineers, you are efficient and motivated. You have been recruited for the designing of future vehicles: cleaner, more ecological and recyclable.

Everything is planned to put the participants in conditions similar to the 24 hours of Le Mans: helmets for pilots, checkered flags for the start, podium and champagne for the winners, of course...

Several vehicles are available: Formula 1, Roman chariot, plane, 2 CV, tractor... or even dugout canoe !

Included :

The activity : creation, organization and management / The presence of professionals animators (salary, charges) / The whole furniture (cardboard, scissors, scotch, seersucker...) / The whole material needed to create the atmosphere « race circuit » (suits, helmets, flags...) / Moving staff and equipment / RC Organization Assurances
