NEW

What if your Team Building activity turned into a “Serious Game” ?

Our “Serious Game” activities address issues related to “change management”.

Role playing scenarios encourage analysis, interaction and collective decision-making through collaborative and recreational activities. This concept allows your team to experiment their own gaming solutions and develop effective solutions to your managerial issues.

Our “Serious Game” activities are identified by this pictogram.

COHESION CHALLENGES

Step 1 : Collective strategy on a tablet

Equipped with a tablet, you will go on an orienteering team run during which you will have to find lots of hidden geolocated tags in a specific area.

During your map-reading run, you will also have riddles to solve, hints and secret codes to collect or original group challenges to take up.

Step 2 : Individual performance to the benefice of the team!

Be ready to face individual challenges at different gaming spaces!

Have fun with our crazy mini-games and earn precious points for your team that put it on the podium !

You will have to be observant, strategic, logical, and above all united. These are secret to win points and to come out first in this challenge !

On your mark, get set, GO !

BUILD & RACE

We are in time of great crisis, there will soon be no petrol: the gas price keeps increasing, pollution has got worsened... So, let's then build up tomorrow's vehicles together : a formula 1 or a Roman chariot made of reusable cardboard, of course !

You are brilliant engineers; you are efficient and motivated. You have been recruited to design future vehicles : cleaner, more sustainable and recyclable.

For the final race everything is planned to put the participants under similar conditions as in the 24 hours of Le Mans Race: helmets for the pilots, checkered flags for the last lap, podium and champagne for the winners, of course...

A great moment of adrenaline for the pilots and spectators !

Choose between :

- ✓ Formula 1
- ✓ Roman chariot
- ✓ Aircraft
- ✓ Tractor
- ✓ Canoe
- ✓ 2CV

NUDGE YOUR TEAM

What is Nudge ? Nudge is a concept in behavioural sciences that proposes positive reinforcement and indirect suggestions as ways to influence the behaviour and decision-making of people, without having to force or direct them.

Today, the Nudge concept seduces many companies which are convinced by its efficiency in terms of behaviour change, immediate adhesion and cheap cost.

The participants will first be introduced to Nudge theory and learn the main principles using concrete examples as illustrations. Then they are divided into small groups.

They will have to create their own solutions through games and group activities.

Our expert team will suggest different scenarios that put you on real situations; this allows each team member to express and share ideas, and develop efficient solutions as well.

Will you win the Nudgebel Prize?

GOURMET CASINO

Like no other, our Gourmet Casino is an **interactive and attractive programme** that will surprise you by its approach. In fact, you will enjoy **betting at famous Casino tables** while using your senses to discover some **foods** just by **tasting** them, **smelling** them and **touching** them.

Such combination seems weird at first. But you would love **guessing** the origins of a **wine** or the flavour and odour of a **cheese** all the **while playing** and **gambling** with your chips.

This activity is accessible to all, and it is a **good excuse to discover some local products** and to learn more about them, above all if you are not a professional Casino gambler.

By the end of the evening, an **auction sale** will take place in a festive and friendly atmosphere. The most participative players will be rewarded, for their good luck or audacity...
